

Pro-inframe

Trade only manufacturer and supplier of CNC products for complete kitchen and bedroom solutions.

- ◆ Fast order fulfilment
- ◆ Competitive price point
- ◆ Precision Guaranteed

Pro-inframe is designed to provide installers and makers the opportunity to offer high end inframe products with a fast order turnaround and at a competitive price point.

- ◆ Five door styles [all with choice of either flat panel or raised & fielded panel]
- ◆ Three frame styles - Beaded, Square or Chamfer.
- ◆ Accessory items: plinth, cornice, end panels, mantels etc
- ◆ Capability to offer both 'Blum' style hinges and also butt hinges. Our unique manufacturing process ensures that butt hinge fixings are of equal strength to those in solid wood construction.

Project Example

Square edge doors
with flat panels
in square frame

Finished with F&B
Purbeck Stone

WHAT IS PRO-INFRAME?

Pro-Inframe door and drawer fronts are CNC machined from a single sheet of 22mm thickness Hidrofugo MDF. Thereby creating an extremely stable and durable product, and eliminating future possibility of movement and open joints.

Hidrofugo is the industry-standard moisture-resistant MDF board that complies with EN 321 and V313 specifications for high-humidity applications. This board is the go-to choice for construction professionals and specifiers seeking reliable, high-performance materials for demanding environments.

THE PROCESS:

- ◆ **Select a door style**
- ◆ **Select a frame style**
- ◆ **Select a cabinet layout**
- ◆ **Select cornice, plinth**
- ◆ **Select other accessories ie end panels etc**
- ◆ **Send a rough sketch and dimensions.
We will return a quotation to you.**

Including the inframe door and drawer, end panels, cornice, plinth, mantels and other accessory items.

For an idea of cost, request our trade price guide showing the most commonly specified items.

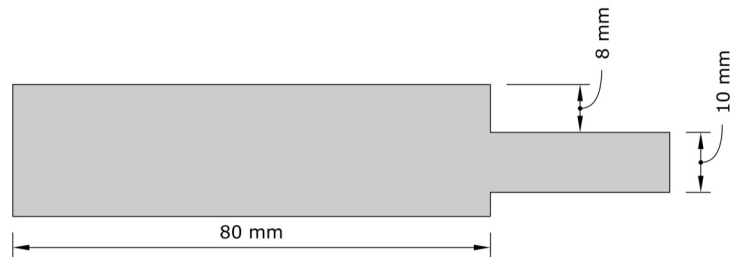

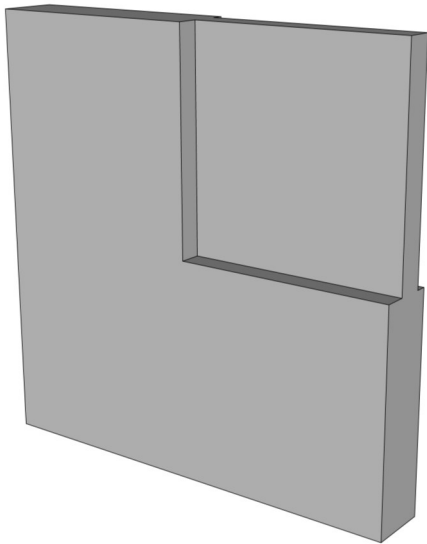

For a quotation, send us a rough sketch and dimensions and we will return a quote to you.

Upon order payment, a comprehensive drawing pack for each component will be provided for sign off prior to commencement of production.

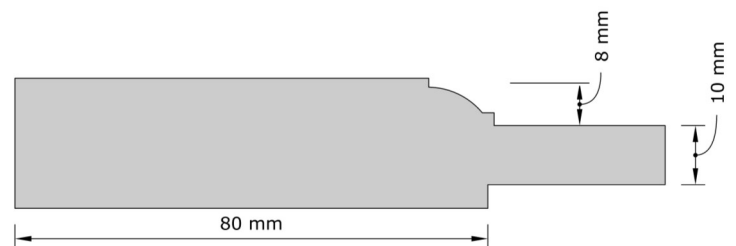

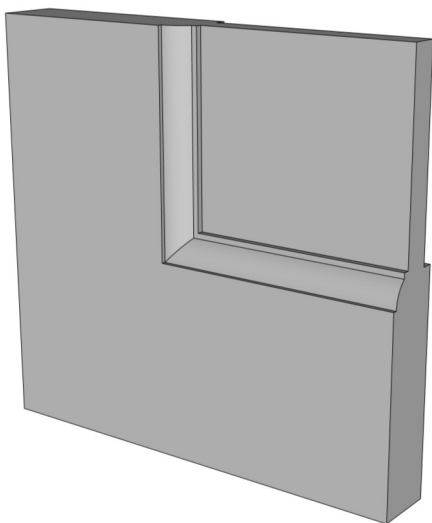

An elevation drawing presentation is also available on request at an additional cost.

◆ DOOR STYLES

- ◆ Five door styles [all with choice of either flat panel or raised & fielded panel]
- ◆ Three frame styles - Beaded, Square or Chamfer.
- ◆ Accessory items: plinth, cornice, end panels, mantels etc

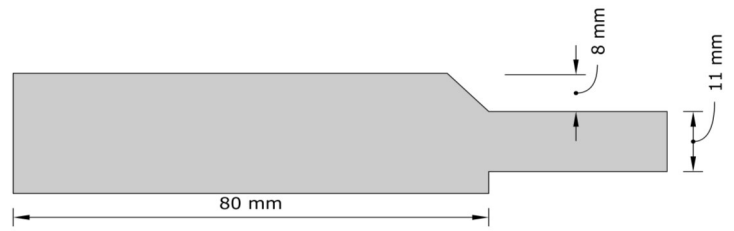

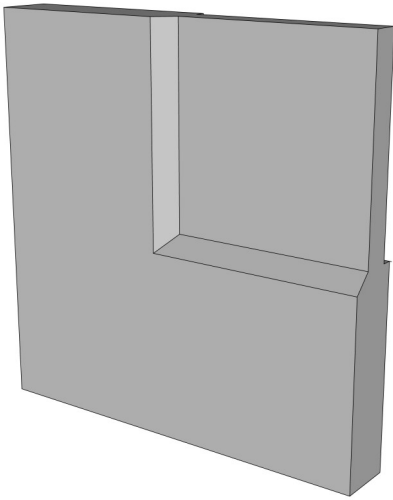

SQUARE EDGE

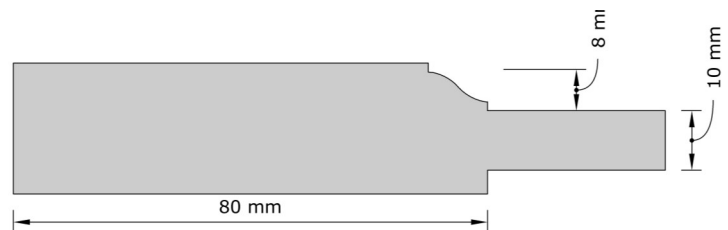

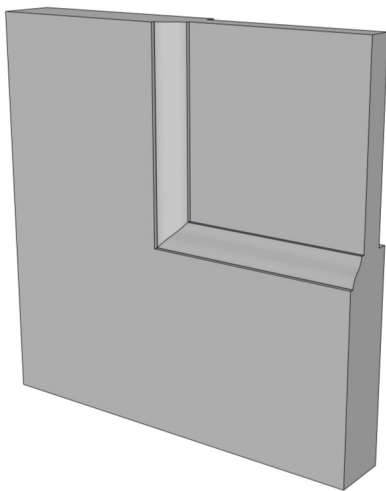

OVOLO

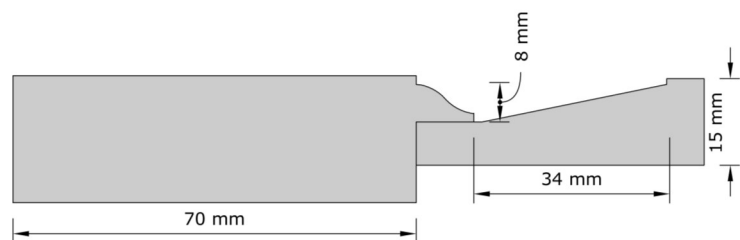

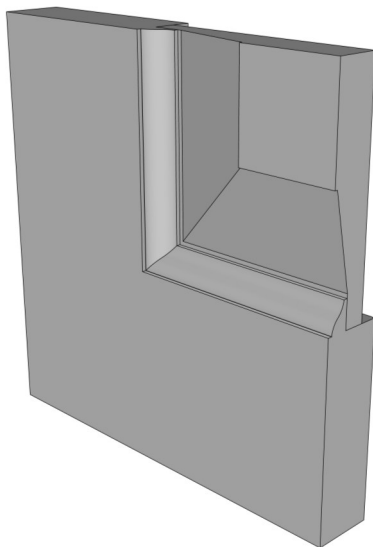

All door profiles are available with either flat panels or raised & fielded

CHAMFER

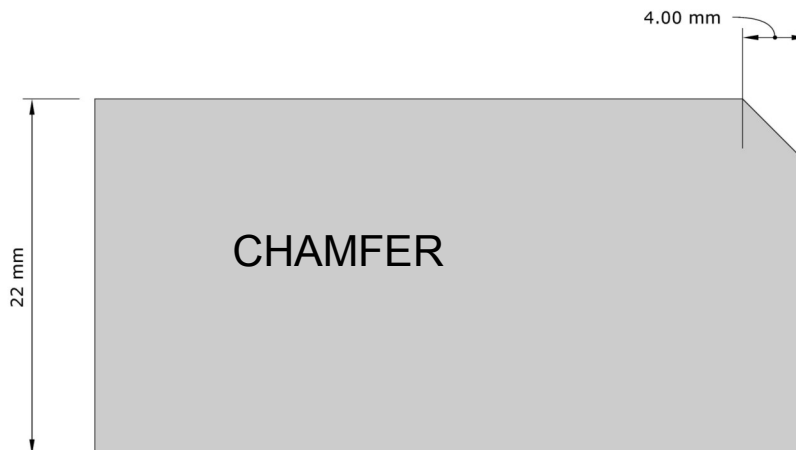

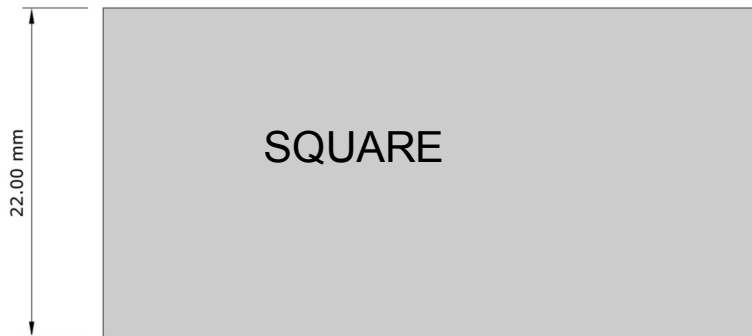

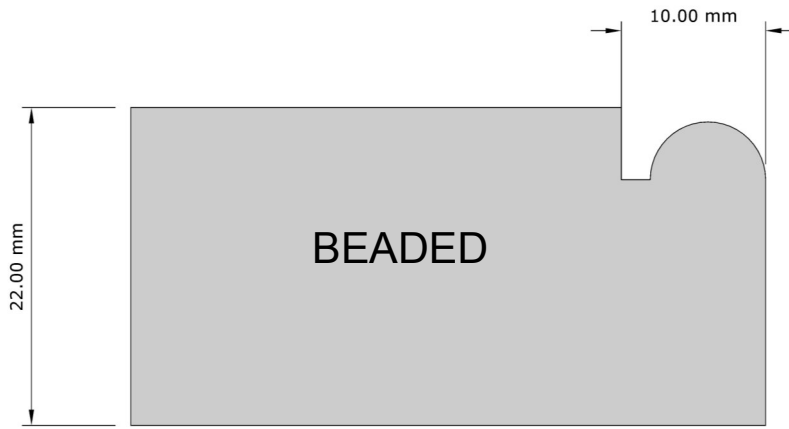

OGEE

RAISED & FIELDDED

All door profiles are available with either flat panels or raised & fielded

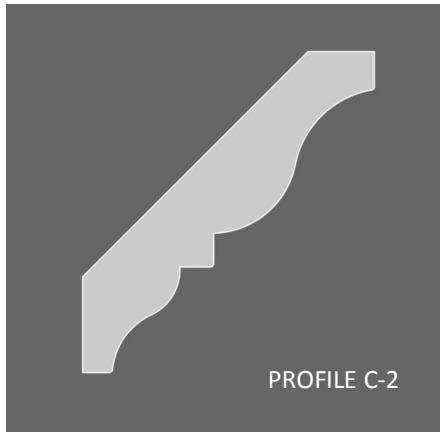

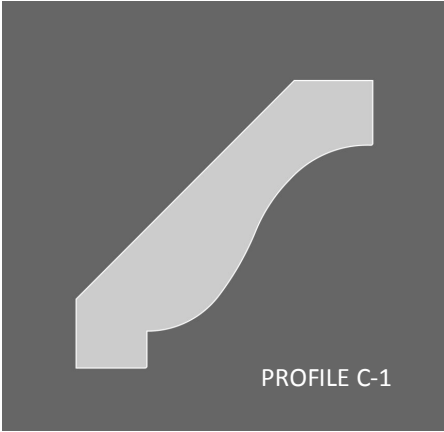

FRAME OPTIONS

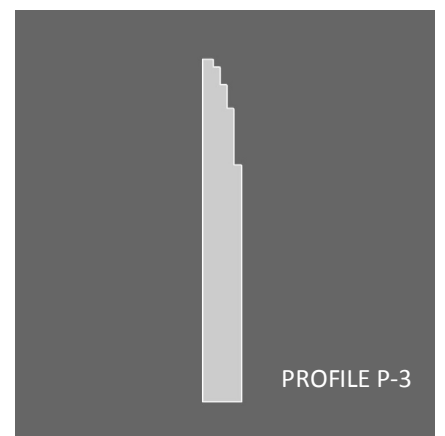

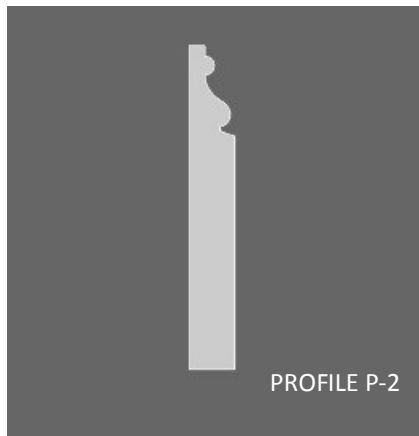

SUNDRY ITEMS

Range of items including plinth, cornice, mantels, end panels etc.

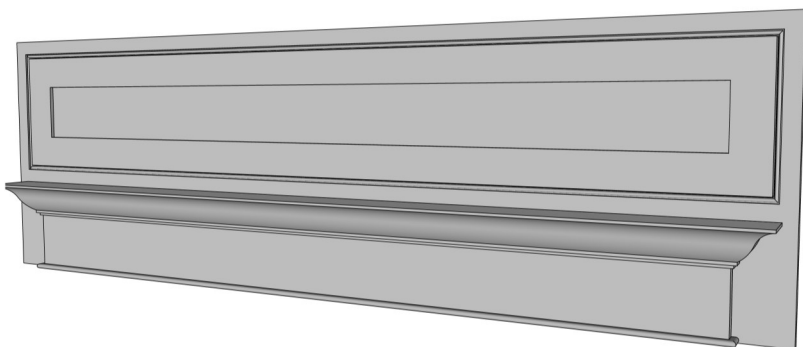

CORNICE

TWO DRAWER EQUAL

DOUBLE DOOR + DRAWERS SPLIT

TALL DOUBLE DOOR

TALL SINGLE DOOR

Project Example

Ogee doors with flat panel and beaded frame

Finished with F&B Railings

THE BENEFITS OR PRO-INFRAME

Products and costs are only available to the TRADE.

Items are easy to take from raw MDF - to primed - to topcoat.

Where our priming service is selected, products will arrive ready to topcoat.

CNC cut for perfect margins, and doors pre hung.

No joints equals no movement or cracking of paint over time.

Items are unbranded - giving you the opportunity to create your own branding.

Advantages through Processes saved for customer

Outsourced production of doors and frames equals time saved and profit maximised.

No investment on machinery

Frees up of labour/man hours in production

Increased diary capacity

CNC precision, eliminating human error

No storage of materials and no disposal of workshop waste

Minimal investment - maximum profit
